carpets

Indulge in the luxury of our Theatre Collection.

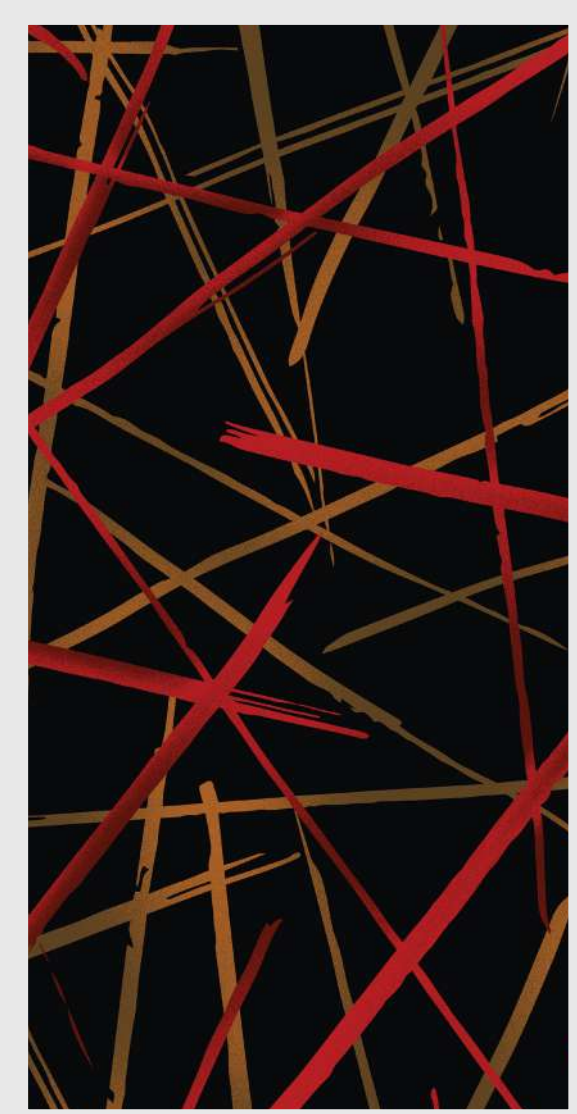

## The concept

Bioscope represents an innovative approach to enhancing the cinematic experience through the often-overlooked medium of flooring. Designed specifically for cinemas and movie theaters, this collection of printed broadloom carpets aims to immerse patrons in the magic of cinema from the moment they step foot inside the theater. It represents a groundbreaking fusion of contemporary design aesthetics and cinematic allure, redefining the ambiance of movie theaters through geometric and minimalistic patterns. Bioscope celebrates the inherent beauty and precision of forms, incorporating elements such as lines, angles, and shapes to create visually striking patterns. Each carpet design within this collection is carefully crafted to enhance the immersive quality of the movie theater environment. Bold colors, dynamic patterns, and intricate details work in harmony to captivate the senses and create a visually stimulating backdrop for pre-show anticipation.
